

PRIYA MALIK

Computer Science and Engineering (Artificial Intelligence) Student

+91-7618433490 | priyee1626@gmail.com | linkedin.com/in/priya-malik-32730333b | github.com/Priyaa916

PROFESSIONAL SUMMARY

Computer Science and Engineering student specializing in Artificial Intelligence & Machine Learning, with hands-on experience in Python, Java, SQL, MySQL, Tableau, OpenCV, and web technologies. Skilled in data analysis, visualization, machine learning, and problem-solving, with experience developing projects including a real-time sign language recognition system, virtual contrast-enhanced brain MRI research, and an SQL-driven E-Commerce Insights Dashboard. Strong foundation in Data Structures & Algorithms, database management, and analytical thinking, with a keen interest in applying technology to solve real-world problems.

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Artificial Intelligence)

Meerut Institute of Engineering and Technology, Meerut, India | 2023 – 2027 | CGPA: 8.5 / 10.0

PROJECTS

Real-Time Sign Language Recognition System | Python, OpenCV, Machine Learning

- Designed and developed a real-time sign language recognition system from broadly defined requirements using Python and OpenCV.
- Implemented an automated image preprocessing and gesture-detection pipeline with machine learning-based classification.
- Enabled low-latency recognition of hand gestures to support more accessible communication.
- Optimized preprocessing and recognition workflows to reduce processing overhead and improve prediction accuracy and system performance.

SQL-Driven E-Commerce Insights Dashboard | MySQL, SQL, Tableau

- Cleaned and analyzed large-scale Online Retail data using MySQL and SQL queries to identify key sales and customer trends.
- Derived actionable insights into revenue, customer behavior, product performance, and country-wise sales to support data-driven decision-making.
- Built an interactive Tableau dashboard to visualize KPIs, revenue trends, customer insights, and business performance.

Virtual Contrast-Enhanced Brain MRI Without Gadolinium (Ongoing) | Python, Machine Learning

- Exploring machine learning approaches for generating virtual contrast-enhanced brain MRI images without the use of gadolinium-based contrast agents.
- Researching MRI preprocessing techniques, image normalization, and suitable deep learning architectures for virtual contrast enhancement.
- Currently developing the initial pipeline and evaluating model approaches for image quality and contrast representation.

CERTIFICATIONS

- Deloitte – Data Analytics Job Simulation
- TATA – Data Visualization: Empowering Business with Effective Insights
- Cisco Networking Academy – Introduction to Cybersecurity

TECHNICAL SKILLS

Programming Languages: Java, Python, C++

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming (OOP), DBMS, Operating Systems, Software Engineering

Software Development: Problem Solving, Debugging, Testing

Web Development: HTML5, CSS3, JavaScript

Database: MySQL, SQL

Data Analytics & Visualization: Tableau, Power BI, MS Excel

Machine Learning & AI: Machine Learning, OpenCV, Basic AI Concepts

Tools & Version Control: Git, GitHub, VS Code

SOFT SKILLS

Problem Solving, Teamwork & Collaboration, Adaptability, Quick Learner, Creative Thinking

INTERESTS

Singing, Photography, Photo & Video Editing, Art & Craft
